

MIA WEBINAR SERIES

AI for Sustainability: The Future of Climate & ESG Reporting

7 & 8 September 2026 (Monday & Tuesday), 1.00 pm – 5.00 pm

This practical programme transforms how finance and sustainability professionals approach ESG and climate reporting. It will also explore the modern AI toolkit that automates data collection, validates disclosures, enhances supply chain visibility and predicts climate risks.

Participants will learn to automate ESG data ingestion, generate audit-ready reports, perform materiality assessments with AI, and build simple automated workflows that turn raw sustainability data into strategic narratives freeing up time for high-value advisory work.

With mounting regulatory pressure from the EU's Corporate Sustainability Reporting Directive (CSRD), the ISSB standards, and Malaysia's National Sustainability Reporting Framework (NSRF), organisations that fail to modernise their reporting approach risk falling behind. This programme equips you with the practical skills to stay ahead.
